I'm Simón Cifuéntes!

A ten-year-old artist
greatly passionate about
music!

I'm specially fond of
Colombian music and
like to play several
instruments.

Always
accompanied by a
nice dance step!

Let me tell you about one of my most recent great experiences I participated in the contest.

You may push the red button to watch a piece of my participation, I got to the semifinal stage!

I forgot to tell you I also like musical recordings, I have fun editing my recordings and, even though you don't believe it, at my short age I know how to manage professional music editing programs.

All this experience resulted in my most recent musical production
